

Giga Songulashvili

Senior Software Engineer

**Authorized to work in the United States - Green Card*

+1(804) 564-2439 | giga.songulashvili@gmail.com | [LinkedIn](#) | Arlington, VA, US

Summary

Senior Software Engineer with 12+ years of experience delivering scalable web and mobile applications in both startup and enterprise environments. Adept at leading end-to-end product development from architecture and backend systems to modern frontend experiences and cloud infrastructure. Skilled at translating business goals into technical solutions, optimizing performance, and driving innovation in fast-paced, collaborative teams. Passionate about building impactful products that combine technical excellence with real-world user value.

Skills

Frontend & Mobile: ReactJS, React Native (Expo), Angular, VueJS, NextJS, Web Components (StencilJS), TypeScript, JavaScript, Material UI, Storybook, TailwindCSS.

Backend & APIs: NodeJS/ExpressJS, Supabase (Auth, Storage, Edge Functions), REST APIs, GraphQL, Microservices, PHP/Laravel.

Databases & Cloud: PostgreSQL, MySQL, AWS (S3, IAM), GitHub Actions (CI/CD), Railway.app, Azure (Azure Data Factory, Azure Purview), Microsoft Azure DP-203 certificate 2023-2024.

Testing & Quality: Jest, Cypress, Puppeteer, Karma, Jasmine, TDD

Collaboration & Tools: Git/GitHub/GitLab, Agile (Scrum/Kanban), Figma, Jira, Linear, Slack.

Experience

Nately | Lead Engineer

Arlington, VA, US
May 2025 - Current

Nately is a social good startup focused on leveraging mobile technology to foster community engagement.

- Designed and developed a cross-platform mobile app using React Native (Expo) and Supabase for authentication, real-time interactions, and database management.
- Built core features, including deed creation, claims, reactions, and comments, with scalable database functions in PostgreSQL.
- Integrated AWS S3 and AWS CloudFront for secure and scalable media storage, enabling users to upload and share photos and videos.
- Developed Supabase Edge Functions as microservices for core business logic and automated backend workflows using GitHub Actions to trigger scheduled tasks.
- Implemented a modern UI/UX with state management via Jotai, optimized performance for large data sets, and integrated push notifications.
- Architected a custom admin panel for user management, reporting, and moderation.
- Led product roadmap, from prototyping in Figma to cloud deployment and infrastructure planning on AWS and Supabase.
- **Technologies:** ReactJS, NextJS, React Native, TypeScript, Expo, Supabase (Auth, Storage, Edge Functions), PostgreSQL, AWS (S3, IAM, CloudFront), GitHub Actions, Jotai, Node.js, Figma

Tactable | Senior Software Engineer

Toronto, ON, Canada
Mar 2023 - May 2025

Tactable is a boutique cloud, data, and AI engineering firm that offers architecture, development, and implementation services to enterprise organisations and technology disruptors around the world.

- Develop and maintain a Shopify application using Node.js, React, and TypeScript to enhance user experience and application functionality.
- Lead the migration of legacy APIs to newer versions, ensuring smooth transitions and continuous business operations.

- Conduct comprehensive unit testing to troubleshoot and optimize software components, improving system reliability and performance.
- Implement an application upgrade from cookie-based authentication to token-based sessions, strengthening system security and protecting user data.
- Collaborate with a dynamic development team, following Agile methodologies to accelerate project completion and enhance workflow efficiency.
- Designed and automated data transformations using Azure Data Factory.
- Applied data governance and lineage tracking with Azure Purview.
- **Technologies:** JavaScript, TypeScript, HTML/CSS, ReactJS, NodeJS, PostgreSQL, GraphQL, Shopify Applications, Git, GitLab, Scrum/Agile methodology.

Briza | Senior Software Engineer

Toronto, ON, Canada
Apr 2021 - Dec 2022

Briza Insurance is a startup SaaS company operating in the insurance sector, with a focus on small commercial insurance. The company connects insurance companies (carriers) to brokerages, providing an API that enables insurance brokers to connect with a wide range of carriers and offer their clients a variety of insurance products.

- Developed internal tools to accelerate carrier integration, utilizing the VueJS framework for the frontend and NodeJS/Express for the backend.
- Created a framework-agnostic web components library based on Web Components technology, enabling developers to deliver optimal experiences for merchants using the Briza API.
- Leveraged ReactJS to implement and efficiently prototype the company's design system.
- **Technologies:** JavaScript, TypeScript, HTML/CSS, ReactJS, VueJS, Web Components (StencilJS), Storybook, NodeJS/ExpressJS, PostgreSQL, Jest, Cypress, AWS, Git, GitHub, Test Driven Development, Scrum/Agile methodology.

EPAM System | Software Engineer

Katowice, Poland
Mar 2019 - Apr 2021

EPAM Systems is a leading digital platform engineering and software development company. The firm offers a range of services, including strategy, design, development, maintenance, support, and optimization. EPAM works with clients across various industries to create innovative software solutions. The company boasts over 30 years of experience and a team of more than 55,000 professionals.

- Developed a reusable UI component library supporting CSS variables for design customization and utilized Shadow DOM to encapsulate markup structure and styling, isolating component behavior from other code.
- Created test routines and schedules to ensure test cases accurately mimicked external interfaces and fully addressed all requirements.
- Developed and documented style guidelines for the customer's primary application.
- Mentored junior and mid-level developers in ReactJS, sharing expertise and guidance to advance their technical skills.
- **Technologies:** JavaScript, TypeScript, HTML/CSS, ReactJS, Redux, Angular, Web Components (StencilJS), Storybook, NodeJS/ExpressJS, PostgreSQL, Jest, Puppeteer, Git, GitLab, Scrum/Agile methodology.

Adjarabet | Software Engineer

Tbilisi, Georgia
Jan 2018 - Feb 2019

Adjarabet.com is an online gaming and entertainment company based in Georgia. The company offers a range of gaming options, including sports betting, casino games, and online poker. Adjarabet.com is licensed by the Georgian government and is committed to providing its users with a safe and fair gaming experience.

- Implemented new features, fixed bugs, and optimized performance for an Angular-based web platform.
- Refactored a significant portion of the codebase to adhere to clean code principles.

- Integrated an online chat system (Zoho SalesIQ).
- Collaborated with management and development teams to prioritize requirements, resolve conflicts, define content criteria, and select optimal solutions.
- Evaluated code to ensure validity, proper structure, compliance with industry standards, and compatibility across browsers, devices, and operating systems.
- **Technologies:** JavaScript, TypeScript, HTML/CSS, Angular, Nrwl/Nx, Zoho SalesIQ API, Karma, Jasmine, Git, GitLab, Scrum/Agile methodology.

UniPAY | Front-End Engineer

Tbilisi, Georgia
Oct 2013 - Dec 2017

UniPAY Ltd is a financial technology company that provides payment processing services. The company offers a range of payment solutions, including online and mobile payment processing, e-commerce payment gateway services, and point-of-sale systems. UniPAY collaborates with merchants, banks, and other financial institutions to offer customers secure and convenient payment options.

- Developed a web platform implementing e-wallet business logic.
- Collaborated with the back-end development team to build Joomla-based web applications.
- Implemented payment systems supporting e-invoices, e-cards, and online payments.
- Established procedures for ongoing website revisions.
- Created cryptocurrency exchange pages, enabling customers to buy, sell, and exchange cryptocurrencies via a user-friendly interface built with AngularJS.
- **Technologies:** JavaScript, TypeScript, HTML/CSS, Angular, Nrwl/Nx, AngularJS, Material UI, Git, GitLab, jQuery, Ajax, PHP, Joomla, Laravel, WCM/CMS, MySQL, Kanban methodology.

Education

Ilia State University

Diploma in Information Technology of Banking Systems

Tbilisi, Georgia
Graduated Jul 2010

Information Technologies Vocational Training Centre

The Qualification of Specialists in Web Technologies.

Tbilisi, Georgia
Completed Jun 2010
